About Me

I'm a Front-End Developer specializing in **React**, **Next.js**, and **TypeScript**, with experience building scalable web applications, integrating APIs, and optimizing performance for fintech, gaming, and payment platforms.

Technical Skills

Languages: Javascript, TypeScript, PostgreSQL, CSS/SCSS, HTML

Frameworks and Libraries: React, Next Js, Node Js, React Native, Chakra UI, Cypress, StoryBook

Testing: Cypress, Jest

Tools and Platforms: Docker, GIT, Supabase

Experience

Infinity Corp

March 2025 – Now

Front End Developer

Argentina

- Developed a scalable and maintainable Backoffice application for managing hundreds of online casinos, using React, Vite, and TailwindCSS.
- Developed online casino applications for clients, featuring real-time gameplay and betting, optimized for performance, speed, and user experience.
- Integrated React Query for efficient and scalable remote state management, and used Docker for containerization of the applications.

Polynomium

January 2024 – January 2025

Full Stack Developer

Argentina

- Developed and maintained a cross-border payment application using Next.js for the frontend, and Supabase for the database.
- Utilized Docker and Docker Compose for containerization and deployment of the application on Google Cloud, ensuring scalable and reliable performance.
- Integrated the Pix API provided by the Central Bank of Brazil to enable Brazilian customers to make payments in Argentine stores.

Castor, Inc

September 2021 – December 2023

Front End Developer

México

- Contributed to the development of a fintech app, utilizing React.js and Vite for frontend development.
- Integrated external APIs, including the Mexican government's facial authentication, for enhanced security measures.
- Implemented functionalities for users to pay various services such as phone recharge, car insurance, water payment, electricity payment, etc.
- Developed onboarding processes to collect user data, including names, RFCs, signatures, and more.
- Integrated an API called Cacao for displaying, activating, deactivating, and deleting user credit cards within the app.
- Created a robust dashboard for the support service team using Next Js, enabling efficient management of user accounts and actions such as viewing card movements and activating Cacao cards.

Freelance

March 2021 – September 2021

Web Developer

Argentina

- Collaborated with a graphic designer from Fiverr to create several web pages for diverse customers.
- Employed Next.js and React.js with Vite for efficient and responsive web development.
- Developed an E-commerce platform for an interior designer, incorporating a backend database managed in Excel for simplified stock and pricing updates.
